Switzerland
Tel: +41-44-2552071
Fax: +41-44-2554449

OPEN CALL

For Abstract Selection Committee Members (representing Clinical Science) at the European Pancreatic Club (EPC)

MINIMUM REQUIREMENTS

- Very good command of spoken and written English
- Personal commitment and time resources for volunteer work

ELIGIBILITY

- The applicant needs to be a member of the EPC during the term of abstract selection (2015-2018)
- The applicant has to be internationally acclaimed clinician
- The applicant has to have at least 2 communications (submitted abstracts, or poster, oral presentation or invited lectures) at the main or satellite EPC meetings (as a first or co-author)
- The applicant needs to assume to review the abstracts submitted for the EPC meeting within the given deadline
- The abstract scoring has to be fair and without bias
- Members of the Abstract Selection Committee are not allowed to score abstracts in which they are noted as author

TERMS OF OFFICE

- Members of the Abstract Selection Committee will be elected for 3 years (from January-January)
- Second term is not possible
- No parallel membership in EPC committees possible

SUBMITTING APPLICATIONS

Application has to be addressed to the Secretary of the EPC and must be in English.

Applications must include:

- filled application form (can be downloaded from the EPC webpage)
- CV

Applications will be filed and tagged by the Secretary of the EPC. Should the application prove deficient, the Applicant shall be notified at the e-mail address given by him/her within five working days. The Applicant then should eliminate the deficiency revealed within another five working days.

Arrival deadline for the submission: 1st May, 2014

Eligibility will be checked by the Council. Elections are performed at the General Assembly in the forthcoming EPC meeting in Southampton according to the rules stipulated in Article V in the statutes of the EPC.

EDUCATIONAL ACTIVITIES

Teaching

Research Methodology; Biochemical, Cell Biological and Histological Techniques 1998 - 2002

As a research fellow in the Pancreas Research Group, I was responsible for teaching and training undergraduate, graduate and summer students along with research fellows and post-doctoral associates who were part of our group. Typically I had 2 to 4 such trainees. Most of them had no prior knowledge in the areas of pancreatitis and many times had no experience in research. My main task was to teach them research methodology and train them in a variety of biochemical, cell biological, and histological techniques. I also taught the students and fellows in the group how to calculate, interpret and present their experimental findings and write and prepare manuscripts.

Harvard Medical School and Beth Israel Deaconess Medical Center
Boston, Massachusetts

Principles of Management of Important GI Diseases As a fellow in gastroenterology, I taught residents the principles of management of important GI diseases. I also attempted to bridge the gap between the bench and the bedside pertaining to acute pancreatitis by presenting original work with potential therapeutic implications at departmental conferences. Mayo Clinic Rochester, Minnesota	2005 - 2008
Case-based Management of Gastrointestinal Problems As a clinician scientist, I mentored residents with an academic interest and guided my lab personnel in the design and execution of their experiments. I also taught case-based management of gastroenterological problems and took didactic lectures in gastroenterology. University of Pittsburgh Pittsburgh, Pennsylvania	2009 - 2013
Invited Lecture Division Grand Rounds Representing Pancreas and Biliary Center of Excellence University of Pittsburgh Medical Center Presbyterian Pittsburgh, Pennsylvania	2011
Obesity and Free Fatty Acids in Severe Acute Pancreatitis CME Presented University of Pittsburgh Pittsburgh, Pennsylvania	12/2011
What Drives Organ Dysfunction in SAP: Cytokines or Fatty Acids? CME Presented University of Pittsburgh Pittsburgh, Pennsylvania	07/2013

Mentorship

Song, Albert, MD (Research Fellow) Description: Harvard Medical School, Boston, MA Current Status: Surgeon, Kaiser Permanente	1998 - 2001
Mykoniatis, Andreas, MD (Research Fellow) Description: Harvard Medical School, Boston, MA Current Status: Gastroenterologist, University of Chicago	1999 - 2000
van Acker, Gijs, MD (Research Fellow) Description: Harvard Medical School, Boston, MA Current Status: Gastrointestinal Surgeon, Academic Medical Center, Amsterdam, Netherlands	2000 - 2002
Charania, Munira, MD (Research Fellow) Description: Harvard Medical School, Boston, MA Current Status: Diagnostic Radiologist, Atlanta, GA	2001 - 2002
Orlichenko, Lidlya, PhD (Research Associate) Description: University of Pittsburgh, Pittsburgh, PA Current Status: Research Assistant Professor, University of Pittsburgh Outcomes: (First author: Paper 20, 26, Co-author: 20, 28, 29)	2009 - 2012

Acharya, Chathur, MD (Medical Resident)	2010 - 2013
Description: UPMC McKeesport, McKeesport, PA	
Current Status: Assistant Professor, Virginia Commonwealth University	
Outcomes: (First author: Paper 29, Abstract 29, 31, 34. Co-author: Paper 20, 28)	
Durgampudi, Chandra, MD (Medical Resident)	2010 - 2013
Description: UPMC McKeesport, McKeesport, PA	
Current Status: Clinical Assistant Professor, UPMC Passavant, Pittsburgh, PA	
Outcomes: (First author: Abstract 30, 32, 36. Co-author: Paper 20, 28, 29)	
Noel, Pawan, PhD (Postdoctoral Fellow)	2011 - 2013
Description: Mayo Clinic, Scottsdale, AZ	
Current Status: Postdoctoral Fellow	
Outcomes: (First Author: Abstract 33, 35. Co-author: Paper 26, 28, 29)	
Mishra, Vivek, PhD (Postdoctoral Fellow)	2012 - 2013
Description: University of Pittsburgh, Pittsburgh, PA	
Current Status: Postdoctoral Fellow	
Outcomes: (First Author: Paper 28, Co-author: 29)	
Patel, Krutika (Postdoctoral Fellow)	2012 - 2013
Description: Mayo Clinic, Scottsdale, AZ	
Current Status: Postdoctoral Fellow	
Outcomes: (Co-Author: Paper 28, 29)	
Pannala, Rahul, MD (Assistant Professor)	2013 - 2014
Description: Mayo Clinic, Scottsdale, AZ	
Current Status: Assistant Professor	
Outcomes: PI, Mayo MEGA Award

CLINICAL PRACTICE, INTERESTS, AND ACCOMPLISHMENTS

1. Comprehensive gastroenterology
2. Pancreatic disorders with a focus on acute pancreatitis.

RESEARCH INTERESTS

1. Etiology and pathophysiology of acute and chronic pancreatitis.
2. Vesicular trafficking in the pancreatic acinar cell.
3. Cytoskeletal regulation in the acinar cell.
4. Stimulus-secretion coupling (intracellular signal transduction) in the pancreatic acinar cell.
5. Mechanisms of pre-mature intra-acinar cell activation of digestive enzyme zymogens.
6. Role of Src and PI-3Kinases in pancreatitis.
7. Regulation and role of aberrant tyrosine phosphorylation in acinar cell injury.
8. Alterations of intracellular calcium homeostasis in pancreatitis.
9. Role of apoptosis vs. necrosis in pancreatitis.
10. Relationship between pancreatitis and lung injury.
11. Mechanistic relations between obesity and acute pancreatitis.

RESEARCH GRANTS AWARDED**Active Grants****Federal**

Principal Investigator	Obesity related pancreatic fat worsens local injury via unsaturated fatty acids. Funded by National Institute of Diabetes and Digestive and Kidney Disease, National Institutes of Health. (R01 DK092460-01)	07/2011 - 04/2016
Principal Investigator	Transgastric Local Pancreatic Hypothermia: A Novel, Rapid Multimodal Therapy for Acute Pancreatitis. Funded by Department of the Army. (PR110417)	09/2012 - 09/2015
Program Director / Principal Investigator	Obesity related pancreatic fat worsens local injury via unsaturated fatty acids. Funded by National Institute of Diabetes and Digestive and Kidney Diseases. (R01 R01DK092460)	08/2013 - 04/2016
Co-Program Director / Principal Investigator	Calcineurin in Pancreatitis. Funded by National Institute of Diabetes and Digestive and Kidney Disease, National Institutes of Health. (R01 DK093491-01)	09/2011 - 06/2016

Completed Grants**Federal**

Principal Investigator	Obesity and Acute Pancreatitis, Clinico-pathologic and Mechanistic Correlations. Funded by National Center for Research Resources (NCRR) and NIH Roadmap for Medical Research. (UL1 RR024153)	11/2009 - 10/2010
Principal Investigator	Role of Src in Antegrade Golgi Expansion and Autophagic Acinar Cell Death. Funded by National Pancreas Foundation.	06/2010 - 05/2011

PATENTS

Abstracts

- Bhagat L, Saluja AK, Hietaranta AJ, **Singh VP**, Akella U, Pan A, Steer ML. T-lymphocytes are critical to the development of pancreatitis-associated but not endotoxin-induced lung injury. *Pancreatitis*. 1999; 19(4):415.
- Bhagat L, Saluja AK, Akella U, **Singh VP**, Hietaranta AJ, Song A, Pan A, Steer ML. Role of calcium in lysosomal enzyme redistribution and intra-acinar cell activation of trypsinogen in an in vitro model of pancreatitis. *Gastroenterology*. 2000; 118(4 Suppl 2, Part 1):936.
- Singh VP**, Bhagat L, Hietaranta AJ, Song AM, Pan A, van Acker GJD, Mykoniatis A, Steer ML, Saluja AK. NF- κ B independent upregulation of Mob-1 mRNA expression in rat pancreas following supramaximal stimulation with caerulein. *Pancreas*. 2000; 2(4):480.
- Song A, Bhagat L, Hietaranta AJ, **Singh VP**, Mykoniatis A, van Acker GJD, Pan A, Saluja AK, Steer ML. Macrophage migration inhibitory factor (MIF) does not have a significant effect on the severity of caerulein-induced pancreatitis and associated lung injury in mice. *Pancreas*. 2000; 21(4):481.
- van Acker GJD, Saluja AK, Bhagat L, Hietaranta AJ, **Singh VP**, Song AM. Relationship between intrapancreatic activation of trypsinogen and intrapancreatic sequestration of neutrophils following supramaximal stimulation with caerulein in mice. *Pancreas*. 2000; 21(4):486.
- Bhagat L, Saluja AK, **Singh VP**, Song AM van Acker GJD, Mykoniatis A, Steer ML. Role of actin cytoskeleton in caerulein-induced intra-acinar cell activation of trypsinogen in an in vitro model of pancreatitis. *Gastroenterology*. 2001; 120(5 Suppl 1):1734.
- Bhagat L, Saluja AK, Hietaranta AJ, Akella U, **Singh VP**, Steer ML. Role of T-lymphocytes in regulating the severity of caerulein-induced pancreatitis and associated lung injury in mice. *Gastroenterology*. 2001; 120(5 Suppl 1):2732.
- Song AM, Bhagat L, **Singh VP**, Mykoniatis A, van Acker GJC, Saluja AK, Steer ML. Inhibition of cyclooxygenase-2 (COX-2) enzyme ameliorates the severity of caerulein-induced pancreatitis and associated lung injury in mice. *Gastroenterology*. 2001; 120(5 Suppl 1):2732.
- van Acker GJD, Saluja AK, **Singh VP**, Bhagat L, Song AM, Mykoniatis A, Steer ML. Intrapaneatic activation of trypsinogen precedes and is required for neutrophil sequestration in the pancreas during secretagogue-induced pancreatitis in mice. *Gastroenterology*. 2001; 120(5 Suppl 1):2742.
- Bhagat L, Saluja Ak, van Acker GJD, **Singh VP**, Song AM, Mykoniatis A, Steer ML. Lysosomal hydrolase/digestive zymogen co-localization and intra-acinar cell activation of trypsinogen: Which is the horse and which is the cart? *Gastroenterology*. 2001; 120(5 Suppl 1):2748.
- Singh VP**, Saluja AK, Bhagat L, Song A, Mykoniatis A, van Acker GJD, Steer ML. Regulation of CXC-ELR chemokine expression in mouse acini after supramaximal stimulation with caerulein. *Gastroenterology*. 2001; 120(5 suppl 1):A132.

12. **Singh VP**, Saluja AK, Bhagat L, Song A, Mykoniatis A, van Acker GJD, Steer ML. Secretagogue (caerulein)-induced intrapancreatic activation of trypsinogen is mediated by protein kinase C (PKC), phosphoinositide-3-kinases (PI-3Ks) and tyrosine kinases (TKs). *Gastroenterology*. 2001 Apr; 120(5 suppl 1):A337.
13. Bhagat L, **Singh VP**, van Acker GJD, Song AM, Steer ML, Saluja AK. Arsenite, a non-thermal stressor, induces hsp70 expression in the pancreas and protects against secretagogue-induced pancreatitis by preventing trypsinogen and NF- κ B activation. *Pancreas*. 2001 Nov; 23(4):428-469.
14. Song AM, Saluja AK, Bhagat L, **Singh VP**, van Acker GJD, Steer ML. Inhibition of 5-lipoxygenase ameliorates the severity of caerulein-induced pancreatitis and associated lung injury in mice. *Pancreas*. 2001 Nov; 23(4):428-469.
15. van Acker GJD, Saluja AK, Bhagat L, **Singh VP**, Song AM, Steer ML. Intrapancreatic trypsinogen activation and acinar cell necrosis in secretagogue- and duct infusion-induced pancreatitis are leukocyte independent events. *Pancreas*. 2001 Nov; 23(4):428-469.
16. **Singh VP**, Saluja AK, Nayina S, Bhagat L, Andrade-Gordon P, Steer ML. Par-2 plays a protective role in pancreatitis. *Gastroenterology*. 2003 Apr; 124(4 Suppl 1):A94-A95.
17. **Singh VP**, Bhagat L, Dawra R, Sharif R, Navina S, Saluja A. Protease activated receptor-2 (PAR-2) protects against pancreatitis by stimulating digestive enzyme secretion. *Pancreas*. 2005; 31(4):469.
18. **Singh V**, Bren G, Chari S, Vege S, Badley A. Abstract 1543: Nelfinavir/Ritonavir reduce caerulein induced pancreatic acinar injury in mice without affecting inflammation. *Gastroenterology*. 2005 Apr; 128(4 Suppl 2):633.
19. **Singh VP**, Bren GD, Vlahakis SR, Chari ST, Vege SS, Badley AD. Nelfinavir/Ritonavir reduce acinar injury in mouse caerulein pancreatitis. *Pancreas*. 2005 Nov; 31(4):469.
20. **Singh VP**, Schroeder B, McNiven M. The large GTPase dynamin localizes to and is involved in zymogen secretion at the pancreatic acinar cell apical membrane. *Gastroenterology*. 2006 Apr; 130(4 Suppl 2).
21. **Singh VP**, McNiven MA. Abstract 799: Pancreatic acinar cell damage by supra-stimulation is regulated by Src-mediated cortactin-actin dynamics. *Gastroenterology*. 2007 Apr; 132(4 Suppl 1):A117.
22. **Singh VP**, McNiven MA. Pancreatic acinar cell damage resulting from supra-stimulation is regulated by SRC-mediated cortactin-actin dynamics. *Pancreas*. 2007 Nov; 35(4):428.
23. Orlichenko LS, **Singh VP**. Abstract T1939: Pervanadate induces acinar cell injury via Src activation. *Gastroenterology*. 2010 May; 138(5 Suppl 1):S-611.
24. Orlichenko LS, **Singh VP**. Abstract T1938: Src is involved in caerulein mediated trypsinogen activation via altering the Golgi. *Gastroenterology*. 2010 May; 138(5 Suppl 1):S-611.
25. Orlichenko LS, Baty CJ, Karlsson J, **Singh VP**. C-Src resides on the Golgi in acinar cells and is involved in caerulein mediated trypsinogen activation. *Pancreas*. 2010 Nov; 39(8):1337.
26. Orlichenko LS, **Singh VP**. Brefeldin A causes retrograde collapse of the Golgi, prevents co-localization, trypsinogen activation and reduces severity of pancreatitis. *Pancreas*. 2010 Nov; 39(8):1338.

27. Yadav D, Kim H, Orlichenko LS, **Singh VP**. Vincristine reduces L-asparaginase induced active pancreatitis (AP) by preventing procathepsin B trafficking and trypsinogen activation. *Pancreas*. 2011; 40(8):1308.
28. Orlichenko LS, **Singh VP**. Trafficking of cathepsin B containing organelles to the autophagosome in an ARF-1 dependent manner is required for caerulein induced trypsinogen activation. *Gastroenterology*. 2011 May; 14(5 Suppl 1):S53.
29. Acharya C, Jaligama D, Yadav D, Bae KT, Furlan A, Nichols L, Navina S, **Singh V**. Primary (obesity associated) intrapancreatic fat is quantitatively, morphologically, pathogenically and clinically distinct from secondary (chronic pancreatitis associated) intrapancreatic fat. *Gastroenterology*. 2011 May; 140(5 Suppl 1):S-381.
30. Durgampudi C, Acharya C, Cline R, Orlichenko L, Navina S, **Singh V**. Abstract 82: Lipotoxicity Results in Lethality From Caerulein Induced Acute Pancreatitis in Obese Mice. *Gastroenterology*. 2012 May; 142(5 Suppl 1):S20.
31. Acharya C, Jaligama D, Cline R, Yadav D, Bae KT, Furlan A, Nichols L, Navina S, **Singh V**. Abstract 226: Fibrosis Reduces Severity of Acute Attacks in Chronic Pancreatitis (CP) by Preventing Peri-fat Acinar Necrosis (PFAN) Around Fat Necrosis (FN). *Gastroenterology*. 2012 May; 142(5 Suppl 1):S55-56.
32. Durgampudi C, Noel P, Cline R, Acharya C, Patel K, Jaligama D, **Singh V**. Lipolysis of unsaturated triglycerides worsens acute pancreatitis (AP) outcomes in a model mimicking human disease. *Pancreatology*. 2013 Mar; 13(2):e10.
